With spectacular all-round views, the course is undoubtedly one of the leading golf courses on the African continent. You will need to keep an eye out for the crocodile on hole 3 and the monkey on hole 14 and 15. They might steel your bals.

WILDLIFE

Years ago the area where Kili Villa is located has been returned to nature after it had served as a sisal plantation. Without any active encouragement, wildlife has already begun to return, confident that the land is safe and that water and grazing are plentiful. Located within the borders of the larger estate, the security of the resident wildlife and its habitat are assured.

Over two hundred species have been recorded including Zebra, Wildebeest, Eland, Kudu, Grants Gazelle, Thompson Gazelle, Gerenuk, Dik Dik, Bushbuck, Duiker, Impala and lots of birds. A sign that the rejuvenated bush already houses a complex and self-sustaining ecosystem.

Nearby Arusha National Park offers more of Tanzania's nature treasures in terms of beautiful landscapes and wild life.
