Weather description	Warm evening temperatures and hot days. Sea conditions can be unpredictable.		Fresh mornings but warms as sun rises. Cool evenings too.				Cool mornings and moderate daytime temperatures.		Heat increases significantly as the build up towards the first rains begins however the mornings are still cool.					
Rainfall	Showers can be expected	Isolated storms can be expected					No rain should occur				Afternoon thundershowers can start & then will occur every 4 or 5 days on average.		Showers can be expected	
Wind	Northern wind		Southern wind that can be strong				Moderate southern wind							
Dolphin viewing	Moderate		Good				Excellent		Best month for dolphins	Excellent				
Whale watching	None		None				Moderate		Good	None				
Diving	Diving conditions less favourable from January onwards as the north wind causes the water clarity to diminish, but deep dives are still excellent.		Moderate. Strong winds can make it difficult to dive. Grey reef sharks might be spotted				Good		Due to rain the water may become murky					
Bird watching	Excellent: peak time for birds as migrants are all back and birds are in breeding plumage. Species count goes up to 60		Fanjove has an average of 40 species throughout the year. Mainly sea birds.
